eu.h.sayed@gmail.com | +961 76 067 351 | Tyre, Lebanon | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Laravel Backend Developer with 2+ years of production experience building and maintaining healthcare ERP systems. Skilled in PHP, Laravel, MySQL, SQL, REST APIs, operational reporting, and business workflow automation. Brings an analytical mathematics background and focuses on reliable business logic, maintainable code, and practical integrations.

TECHNICAL SKILLS

Backend: PHP, Laravel, MVC, object-oriented programming, REST APIs

Data & Reporting: MySQL, SQL, database design, operational reports, dashboards

Frontend: JavaScript, jQuery, Bootstrap, HTML, CSS

Tools & Systems: Git, GitHub, ERP systems, OpenAI API integrations

PROFESSIONAL EXPERIENCE

Laravel Developer | FlashMed Company

Feb 2024 - Present

Tyre, Lebanon | Healthcare ERP systems

- Develop and maintain Laravel ERP modules supporting sales, accounting, HR, CRM, inventory, repair, and customer-service workflows.
- Build business logic, MySQL queries, operational reports, aging views, sales dashboards, stock insights, and performance summaries.
- Implement contract-linked inventory tracking for deposited quantities, consumption, availability, adjustments, and invoice relationships.
- Integrate REST services and the OpenAI API into internal ERP workflows while keeping company code and data private.
- Troubleshoot production issues and translate operational requirements into clear, maintainable backend updates.

SELECTED PROJECT

Laravel Job Board | Personal Open-Source Project

[GitHub](#)

Laravel application for companies, vacancies, and job applications, designed to demonstrate practical backend structure and development workflows.

- Uses authorization policies, model factories, database seeders, UUIDs, soft deletes, and Git-based version control.
